Just because I have a B-Stupid Violent Black Humor does not mean that is what my IQ Level is ...

Evil Email, Eeevil Eemail! Dark sky!
Eviillll Eeemaaail, Eeeevil Eeeemaillll!!
Dark sky iii, now am I just pokin' Fun at 'em or laughin' em out completely ...

Why don't you just write it down continuously, "tell it to my fuckin' RSI sir."

It really does feel like a Vampire Demon suckin' your right neck the hole time, I have got the worst RSI with IRS Agent's who I have to

say SIR to the whole time, © Kyle Lance or they'll RSI me. Is it also Proudfoot a mere coincidence across all the incidences that this acronym has the same 3 letters.

Holy Guesome, Spy Kill's

And, once again, my only one not unsympathetic gesture is: SAD World.

It is, indeed, nothing more than one big Sickness And Disease World.

Is this also just another mere coincidence?

HOLY GRUESOME, SPY KILL'S!!

HAL

Not this, It's no more than unendurable HELLH SICKNESS.

Spy Kill's 02 © Kyle Lance Proudfoot

Each and every Sickness And Disease to them is incurable: One big ~~in~~ Valium and Morphine Injection since then ~~and~~ one big Sedation Nuten a Half-Coma State, ~~and~~ another 3/4 Citadel drugs. When all they know is OI Herb ~~and~~ and stare themselves blindly at OI Herb ~~and~~ only they know nothing of the entire herbology. It's not a plant anymore, it's no more the one big Poisonous Chemical Factory. Not the Marijuana, Cocaine and/or Heroin, they are not a plant anymore and not just in the northern regions, do we have to go all the way to Afghanistan to get the fully organic grown by the full moon shit? And, you dare point your finger at me for

my Beer, wine and/or Alcohol © Kyle Lance Proudfoot
 How about their youth across the brain layer alone, thus the total lack of it from OI 18 years of age. HOLY Guesome, Spy Kill!
 The Dead Cell Theory? Those teenagers have No Brain Cells.
 Dead Brain Cells, No Brain Cells, Cancer Cells, Corrupted Cells, Enemy Cells, and/or Sleeper Cells, how many times already?
 It's not Racism and Centurionism, it's Specieism and Milleniasism...
 Do Not blame the Russian's either, who invented Radio waves? Now, you're really freakin out!
 Or, do you not remember, for all their ~~key~~ ~~panels~~, did not Einstein invent Solar Panels? Massive Mind Dis Brainwash Rip!

Spy Kill's 02 © Kyle Lance Proudfoot

You stare yourself blind at the last ⁰³ ~~of~~ 19th Century only when your Roots of Evil lie in the 19th Century... even with the first day of the Industrial Revolution, when was the first day and minute, start betting!

What do you mean in the 21st Century some Hitler sittin' next to the Danube, the 2nd Anti-Christ which Nostradamus did not fail to predict, is it not o-Sam-My-Bun is loading 8-bit CGI Particle Fire as he slides down the west coast of France with his black gaping maw sucking up more Shadow Energy as they aim Nuke test's on his ass, wooooo also Mini-Nukes, yaaa let's try this angle too. Holy Gruesome, Spy Kill!

Why do you think they're train to blow up the Pakistan Market's His 18 little Hydra's, we running around with more like a trillion dollars netp, what the hell do ya mean Bernard's only?

And then Cover Story's about how, all of a sudden, Drones are ineffective at following people, when they already killed 1000's of the Enemy, not excluding Top Al-Qaeda Member's...

Holy Gruesome, Spy Kill's.

It did not fail in friggering, as according to their prophec's in Amanahredda, the 25 year war from the date itself... So what is that, before we get our 1000 year's of Peace And Prosperity, 2037? For the number, Are you sure we are not suffering some kind of Dilation Effect and Calendar Error. - KILLANALOG.R.I.V.

Spy Kill's 02 © Kyle Lance Proudfoot

And then you have these Poly-cracker on Crack Cocaine Politicians with their Poeparazzi Media's bullshitting unending about all of your miseries while they enslave you across total RIP OFF Benzine prices when all y.o.u. gotta do is that Sky Pat Scan thing across each Country - HOLY SHIT where did all the open plains come from while we're starvin' here? Why don't you build

Animal Apartments

Now ol' Rich Elite? Well then we have 99% of the entire human species provide to them? Don't you need Enslave? You want to own entire Planet Earth? HOLY GROVESOME, SPY KILL'S 00.

How about just X entire Planet Proudfoot © Kyle Lance Proudfoot

Stick an X across the whole Earth? And put 400,000 Volt/Watt thing?

Then stick a For Sale sign for \$1 Billion?

Alien's show up and start for \$1 Billion? 'Why don't you donate it to us?'

we are \$1 Deficit which we have to pay for thousands of m. I meanig have to pay

The other four parts do not live next to each other.

Do you also define your system in quarters and quadrants

all descending down to the Hell's. Across a half century per quarterly

in their Red District. What a RIP OFF you are each caught in your own trism. HOLY GROVESOME, SPY KILL'S 00.

Spy Kill's 02 © Kyle Lance Proudfoot

And do you even define your whole system in such quadrant sector modules spiralling upwards like your DNA to the thin ethers above...

There are the Black Holes and Solar Systems, it's now 2-bit obvious. The plus side is the Jews are not guilty of sacrificing Jesus Christ for they took revenge for Lucifer, just like they sacked Rome...

And does your system even have a Corporation Seat or Seat of Corporation? He hangs upside down and sits upside down on their Golden Koopeel cracking jokes about their fraction, faction, fuction, friction, Fractal display fracturing lines down

through the whole thing with © Kyle Lance Proudfoot none of those other Seats of Representation either, while the roof is about to collapse

Where do you think the Elves come from, that's why no one on entire Planet Earth can comprehend anything they're saying, especially after smokin' and drinkin' some of their €4,50 - €6,50 33cl cigs and beers at their Plein...

Try just the translation issues alone from .be, .de, .fr, .nl, .scot, .co.uk, .uk, .ie, .ca, .us, .usa, .co, .com...

We do not need to vote on our sales. Can you span the Government since it is a not commercial enterprise?

Open Market's Free Market's The Open Market's... How about Open Medium everything, OM everything...

Does your High School even have IT, Philosophy, Economics, Religion, Sex Training, Beer, Wine, Smoke, Alcohol, Soft Drug and/or Hard Drug Training or even Cooking?

It's more like good ole Piers Anthony, there is this Huge Rift between High School and Post Education, 200 km's - 20 km's wide and they don't know they have to fly and/or jump across all that competition while being shot at and \$40,000 - \$200,000 later, it's more like Enslavement Society again...

Why do, to date, they all swan dive off of buildings head first, I want to see one at YouTube flap his/her wings as much as possible, "I want to fly, I want to fly awaandoo 444... SPLAT... Maybe,

at least an Angel will laugh © Kyle Lance Proudfoot so hard that he/she will have mercy on you, instead of asking you, if you want to reincarnate into (the) Middle East or Africa since you had it so much better than them...

Holy Gruesome, Spy Kill! ...

TKM. Mode. modus mirorum majoris? splat.

When you die and go into the Bardo State and you meet your Angel and Demon, seeing all things you did and all things others did to you, you also get a long papyrus, which rolls down in front of your feet for GOD knows, how many kilometers, of all your deeds. On the left side are all the minus signs, on the right side is a much shorter cute little list of your plus signs, at the bottom is the grand total sum of your Life Credits to spend on the next one, if you

Before you know it there will be not just 1.2 Bernard Chinese but 2.4 Bernard, munch munch munch, Pac Man the whole Planet Earth and before you know it, it will not just be the Amazon with erosion and no moisture absorption launching multiple consecutive Super Hurricanes but with the SA Cavtel as their best FF, FOF, FAF, FIF, FUF, and Bed Buddies they'll move straight north and we'll have another Kennedy Incident which will not fail to trigger WW04... not just laugh HA! as they also consume all of their own Resources and soon have to eat the Insect's off of the ground. There are billions of Insect's there and they grow back fast and it's even Government to them so it's not like Indissisthen I don't think I could stick a black beetle in front of my nose with all of its rapidly moving legs and pincers, bite its head off and, still jump suck out all of its beetle juices... HOLY GRUESOME, SPY KILL!

As a CA, Scot, Celt and N.Lier myself I am not Anti-Anyone, this part of China is not that part of China and if I have to start deleting Cuisines for all the highly over-exaggerated Camping Competition going on, I am no more than a somewhat not neutral Administrator for you can only be loyal to those who pay your Salary, welfare, Disability check or Pension, and there is no loyalty in the 21st Century... if you don't get me my goddamn product to me in 24/48 hours then I'm goin' to step over to the fuckin' competition... I would first start with the Scottish Cuisine, I mean quck, everyone in the northern regions here eats the following each and every day: 1 brown greasy dead piece of over-cooked meat with soggy smashed potatoes with only butter and 1 completely dead cooked vegetable. And you ask yourself why you are suffering the worst HELL the Industry.

HOLY GRUESOME!

I am not a Vegetarian anymore SPY KILL'S!
 A Vegan? No, do not drop your fat layers with the Poisonous Chemical Factory... Splat!

You're ON TV, Radio.

(ZZZ) Mini Nuke Effect

Taking advantage of your Noobie Victim's weak username and/or password you Obliterate your Victim's website by simply deleting the default or index file or some other deep path default or index file which crashes the whole thing.

You then change as many passwords as you possibly can asap.

Try to get just the right Error Message so the already paranoid Noobie is now completely Terrorized.

Obliteration = Delete as many files and folders as you can asap.

Terrorization = Scare and Severely Sabotage and/or Kill the Noobie. See The Free Show for Kill Mission's.

Note: This is highly NOT Recommended to Activate on a NO Noobie. © Kyle Lance Proudfoot

REMEMBER: You may NOT Commit on a Member. This is to be used NOT Unreal Action of the Character Class like ALL other ONLY on the Share Folder

'Now, I just can't wait till then when they see the Mini Nuke Effect's which I have lined up for them!' says Silber

Yes, sure, first they'll use it for War and then they will use it for Near-Infinite Defenses. Holy Gruesome, Spy Kill's !!

A Massless Object does not exist.

If you remove Time from the equation, Time Does Not Exist, then you travel near-instantaneously with Masslessness across the entire Universe.

Oh oh, now I landed in our suck reality again...

You cannot go back to each nanosecond before your Enemy and win the War, it merely causes a New Timeline like the EM Field coursing around Planet Earth, converging and diverging to the Heavens and Hell, even just another fuckin' Umbrellation.

How is it, a Corporation?

You cannot go back to each nanosecond and win the War... 'No, now it's my turn, slap, no honey, now it's my turn, slap, hey, stop that, that is so unfair, no, you can only cause a new Timeline...'

Shadow Portals are also near-instantaneous. These are even holes in the fabric of space and time. The sky is black through observation may shift because it absorbs Light Energy. Above, private Heaven, into your personal private Reality, or Hell, microscope, Nick Onheil Blake.

The Chaos Theory may not fail to dominate now and then even on a not irregular basis through the millennia of some kind of nihilistic existentialist self-sacrificing Mass Suicide Genocide of the Human Species like another Cannibal Nation, another Cannibal Galaxy with its Black Hole and Solar Sun's, yet will not Andromeda Galaxy and Milky Way Galaxy not collide with each other and result in the one true Final Armageddon where whole Solar System's collide planets are ripped to shreds, the two Black Holes pull towards each other and destroy everything in between as Civilization's blast off in Space Ships to save themselves and then there is only one Black Hole Cannibal Galaxy who goes

Spy Kill's 02 (71) © Kyle Lance Proudfoot © Kyle Lance,

Your Immortality is not based in your hollow host Human body but in your Spirit. The various Cell Theory's such as No Cell, Dead Cell, Corrupted Cell, Cancer Cell, Enemy Cell, Sleeper Cell and other cells, have a very Mortal life cycle, they can only live and regen themselves for so long whether that be an average for Humanity in 21st Century at 50 years, for Planet Earth or 2500 years for Elves and 2600 years for Vampire Demons. In all cases, through all the shades of gray in the Universe, with thousands of Galaxies each with a huge Black Hole and multiple Solar Systems rotating around it, your Black, Dark, Gray, Light and/or White Spirit goes onto the next one through its degrees of bondage. Freedom is highly relative; to be free is to be bound.

Therefore with the Black Hole and Solar Sun, Enemy's of each other even Nemesis's, the Jew's are Not Guilty of his crucifixion.

The IC3 receives thousands of complaints each month and does not have the resources to respond to inquiries regarding the status of complaints.  Holy Gruesome, Spy Kill! Permanent terminated = at a min of 1 Year.
 One of the advantages of the freeshow.eu is that I do not need your IP Address to Ban you for 12 minutes to 2 weeks, they did not fail to Banish them for 1000 Year's, I only need your Instance such as in this case and then they freak out completely again for being Banned for only 12 minutes, what a bunch of Anarchists and Hackers...
 Kick = 12 seconds to 12 minutes for your thinking time and that's how fast they log back on by hacking it cause they get all upset again... Ban Forever for the Insult's terminate = 2 months to 12 months = 2 weeks to 2 months.

with 10's of thousands of Session's of The Free Show to date, I did half of 'em all cause I sleep 12 hours per day then how badly do you think we're out?

How many times do I have to repeat myself that I do not lack any right to do team chat 6.76 if I stick the 5.1 or 7.1 surround system speakers on the roof, still at the tree line on the horizon why does not use my HD Headphones

Your only plus side is that it has a 14 Immunity ratio build up. Click Message left and you ask yourself why me locked up...

Bother me? The medium does not © Kyle Lance LAL bother me since a decade + ago, in fact it never did, it was the only way to escape that shit, right here, did ya in... 'BLA BLA BLA, BULLSHIT'

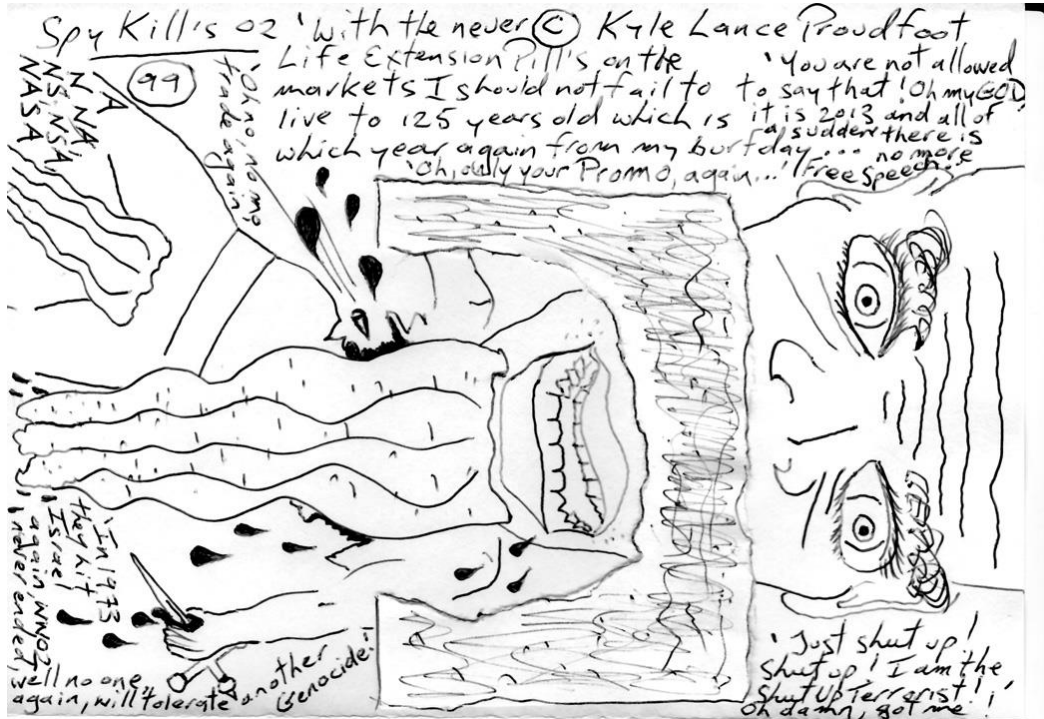

How much lively conversation interaction do ya want, if ya heard some at my previous address you wouldn't just fall off your chair but go all pale face, from caribbean, latino, black to white trash...

You're a high black ape and I'm a lowly white trash, but you forgot my Rank, see you got none sul, sukkel idiot moron, dumbshit, don't even bother tryin' to win verses me, cause I got more rhymes, verses and retorts than Murphy.

You dis me, I dis your whole system in return.

There is some very bad shit in the market at this time, when it is this easy to hit any of your shit with any poison and not just your coffee cup effect at work but with that fully tasteless, transparent, odorless, senseless, fearless, meaningless, headless, emotionless, emoticonless, like a Ghost on Internet, they also blew my 14 month Undercover operation, each and every time calling it 'ppi' and re-addiction.

When even a video theek store closes then you know how bad the Budget is, on the other hand though, thank God we finally don't have to use anymore dirty smudgy, scratchy and hanging DVD's, I mean do you also have to masturbate and come all over it cause the wet little hole is just the right size for you or soft sweet swipe it back and forth across you know what line and lime and limits and all the times we have been already to date with Hollywood, Anasig and even now UK and Canada... Holy Gruesome, Spy Kill's! X! X!

I don't think I want to stick webcams in each and every corner of the floors and ceilings of the rooms of my homes and charge admissions, in Live Session's I might borderline Insult the God Emperor of some Alien Planet...

2D and/or 3D Post Edit then it's not a Live Session or a Live Show or a Big Brother Show or a Spy Show or a Free Show or another Rip Off Truman Show...

Fuckin' Evil, fuckin' evil, if that's not fuckin' Evil!

What do ya mean Privacy for Security, you got none, Low Security, try more like No Security, what a fuckin' LIE.

HA HA HA HA HA!

The Free Show: Start Up Session: Pick a Theme choose a Topic try not to Insult anyone, K.I.S.S. preferably one you have never done before, out of all the Near-Infinite's of subjects it's a little '2-bit obvious when their polycrackers on crack cocaine come charging in again with that same Noobie shit how about even Science and Technology, and for most tryin' to keep it that one rule only is, Near-Impossible Mission Mode, Start Betting, except it's a Null Bet which would fail the whole House. Holy Gruesome, Spy Kill's!
